APPLY WISE

AI Job Application Copilot

Product status and delivery roadmap

Updated June 2, 2026 | Live: https://apply-wise-1.vercel.app

What is live

Apply Wise is a deployed web product for resume-aware job discovery, truthful application preparation, and pipeline tracking. Users can register publicly and maintain private workspaces.

Live architecture

Layer	Technology	Current role
Web app	Next.js 15 / Vercel	Responsive SaaS interface
API	FastAPI / Railway	Authenticated application API
Database	PostgreSQL / Alembic	Persistent product records
Job source	Adzuna API	Live India listings with attribution
Security	JWT + refresh rotation	Protected user workspaces

Implemented workflow

- Register, log in, log out, and refresh an authenticated session.
- Upload a PDF or DOCX master resume and review extracted evidence.
- Search live Adzuna listings and rank jobs against stored resume skills.
- Save roles, update statuses, and monitor dashboard and analytics metrics.
- Prepare evidence-grounded cover-letter drafts and resume versions.
- Set role keywords, location, and remote-only discovery preferences.
- Add application notes and review visible tracker timeline events.

Truthfulness rule

Application drafts use stored resume evidence only. They do not invent employers, skills, projects, responsibilities, or achievements. Every draft remains review-required.

Security and operations

- Argon2id password hashing and HTTP-only refresh cookies.
- Refresh-token rotation with replay detection and token-family revocation.
- Owner admin allowlist configured through Railway environment variables.
- Production secrets stored in Railway variables, not committed to Git.
- Railway health and PostgreSQL readiness probes.
- Schema changes managed with Alembic migrations.

Current limitations

- Adzuna is the first and only live job provider.
- Resume parsing is deterministic and requires user review.
- Drafts are evidence-grounded templates; LLM enhancement is not enabled yet.
- Generated DOCX and PDF resume exports are not implemented.
- Interview rounds and scheduling need a fuller interface.
- Subscription billing and feature entitlements are not connected.
- Extension capture and Playwright autofill remain future work.

Next delivery slices

Order	Slice	Outcome
1	Interview scheduling	Rounds, dates, and interview notes
2	AI-provider enhancement	Stronger grounded resume tailoring
3	Document exports	Downloadable DOCX and PDF resumes
4	Subscriptions	Plans, entitlements, and owner bypass
5	Provider expansion	More compliant listing sources

Repository practice

README.md, docs/PRODUCT_STATUS.md, and this PDF snapshot are updated as product slices ship. Secrets remain outside the repository.
